- ✓ Can be installed in new or existing downdraft spray booths

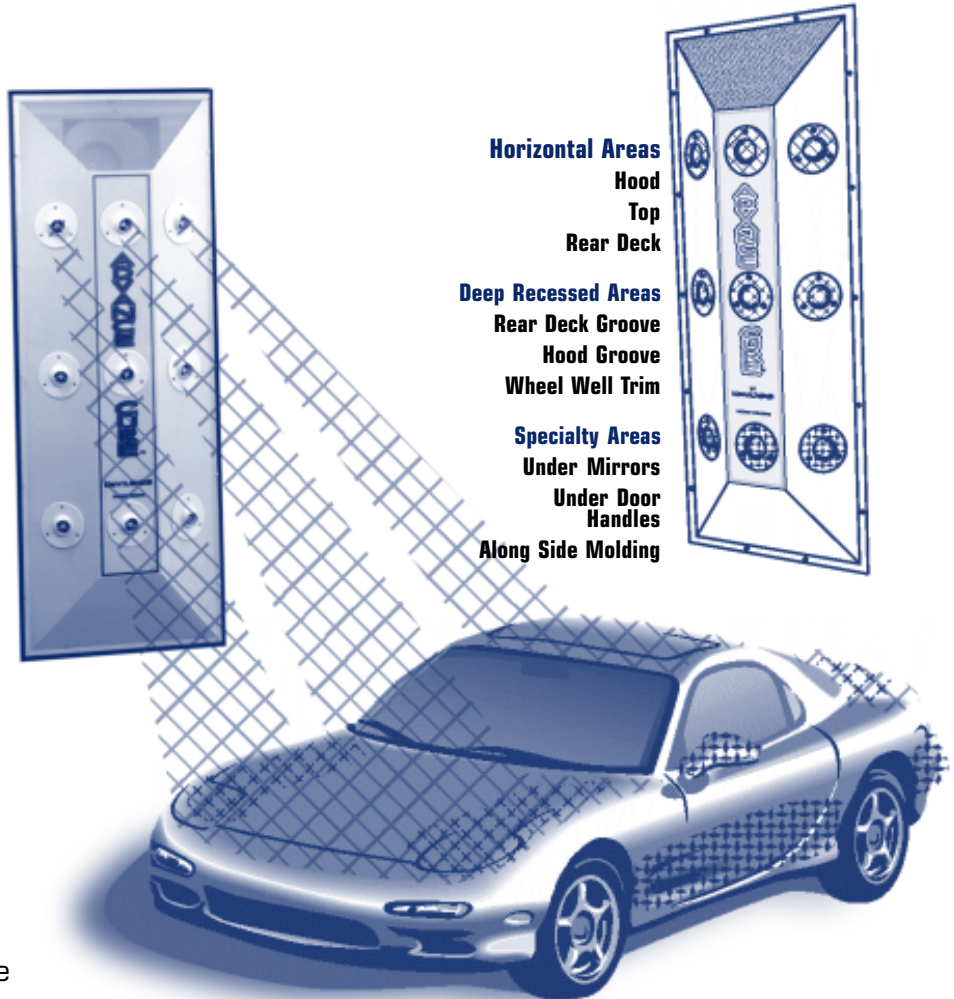

Team Blowtherm®

ADVANCE CURE™

by Team Blowtherm

- Accelerated drying of waterborne material down to approximately ten minutes, even in deep, recessed areas on vehicle
- Complete vehicle or spot drying can be accomplished by activating all four or each separate tower from remote control panel
- Simple, quick directional control of air flow with volume adjustment at each nozzle
- Pinpoint targeting with light beam supplied as standard equipment
- System utilizes filtered, heated booth air moving in excess of 250 feet per minute
- Tested and proven in tech center and body shop environments - 2½ years in development
- Very low operating expense - cost is less than 1¢ per vehicle
- Activates only during bake cycle
- System does not require shop compressed air
- Can be installed on dual or single skin booth enclosures
- Meets all national fire codes
- Virtually maintenance-free
- Exclusive patented design
