Concept XL (single skin)

\$ \$

- Pressurized horizontal flow
- Lower price
- Multi-filtered airflow
- Pre-coated booth finish
- 30% more light
- Heated Forced Dry™ or non-heated ProAir™ air replacement systems

Non-Pressurized Crossdraft Design

Concept XL (single skin)

\$

- Most economical model
- Crossdraft airflow
- Non-pressurized
- High illumination
- Pre-coated booth finish
- 30% more light

Consult your Team Blowtherm sales representative for details of required installation, electrical wiring, conduit, air piping, roof penetrations and automatic fire suppression. The equipment installation location should be reviewed and approved by the local authorities having jurisdiction.

Filtration

Overspray Management Technology

- ◆ Paint Pockets® design holds up to five times more overspray than others, cutting filter changes by up to 80%
- ◆ 99.84% average arrestance at 10 micron
- ◆ The paint “pockets” imbedded in its front surface more than double its effective surface area

Paint Pockets® is a registered trademark of Products Unlimited, Inc.

Booth package options include:

- A wide variety of required air make-up systems: Pro-Air™, Forced Dry™, Recirculating Cure
- Paint mixing rooms
- Vestibules
- 2-axis and 3-axis painters' lifts
- Sound attenuation
- EnviroCure VOC abatement systems
- Control systems: SBC computerized, and electro-mechanical
- Indoor and outdoor air make-up systems

CODE COMPLIANCE

Team Blowtherm Truck and Heavy Duty Spray Booths are designed to meet or exceed OSHA and other codes including NFPA 33, 70, 86, 91, and 101, NFCC, CEC, and BOCA National Building Code.

All designs, specifications and components are subject to change at the manufacturer's sole discretion at any time without notice. Data published herein is informational in nature and shall not be construed to warrant suitability of the unit for any particular purpose as performance may vary with the conditions encountered.

Tech Center

Team Blowtherm's new state-of-the-art 25,000-sq. ft. Technical Training Center, the ultimate environment for testing today's equipment and finishes, is a unique facility, which is widely recognized for its spray booth research and development, and the establishment of finishing and refinishing standards. The new Tech Center features our Ultra XL™ downdraft and our Concept XL™ pressurized crossdraft spray booths. We have available end-user seminars to improve operator effectiveness and provide maximum use of the equipment. This facility is the foremost in research and development, and paint manufacturers' product testing. All of the equipment is "paint-ready" for demonstrations and testing.

A few words about our ESP ...

Extraordinary Service Program
