- Reinforced table top with gun washer cutouts each end²
 - Backsplash
 - Reinforced storage shelf
 - Gun rack¹

¹Gun rack requires wall mounting or other support.

²Gun washer cutout dimensions 18½" deep x 22½" long

A mix room is incomplete without a quality table. A professional table enhances painters' productivity by

- ▶ providing a stable surface for mixing precise formulations, reducing the chance of errors and wasted paint.
- ▶ providing a comfortable place to work.

In fact, our tables are perfect for anyone requiring a steady, smooth, durable work surface.

EASY TO CLEAN

Keeping the mix room spotless is a crucial but often overlooked part of the process to an OEM-quality finish. Our smooth surface stainless steel tables are impervious to spills and easy to wipe down wherever they're used.

LASTS A LIFETIME

These Team Blowtherm mix and shop utility tables are fabricated from 16 gauge stainless steel using easy bolt assembly. You can count on decades of use!
