Extensions

Lighting

- High efficiency Class I, Division 2 fluorescent fixtures (tubes not included)
- Lights are UL and CSA approved

Working Compartment Extensions

Working compartment extensions are specifically designed to increase the working compartment depth of ProClean™ dry filter spray booths.

- Same 18 gauge galvanized panel construction as booth
- Available widths:
 - 3', with or without Class I Div. 2 light fixture(s), all models;
 - 2', no lights, for booths up to 12' wide;
 - 6' with or without Class I Div. 2 light fixtures, for booths 14'-20' wide

As the finisher needs ample room in which to work, the size of a spray booth is critical to the successful performance of the finishers and the spray finishing equipment.

As we are continually trying to improve our products, specifications are subject to change without notice.
